

TERRELL K. GLENN

Seattle, WA | (216) 570-4460 | TGlenn2012@gmail.com | www.linkedin.com/in/tglenn2012 | www.github.com/TGlenn2012

EXECUTIVE SUMMARY

Technical leader with a Ph.D. in Human-Computer Interaction, six years of experience, and notable work at Microsoft. Skilled in hardware engineering, product design, UX research, and product management, with proven leadership in developing technology roadmaps and collaborating across teams. Experienced in driving data-based decisions, evaluating AI solutions, and enhancing user experiences. Recognized for impactful projects that improved satisfaction through rapid prototyping and design iteration. Committed to using engineering and design expertise for innovation and effective product team leadership.

EDUCATION

Purdue University

Doctorate (Ph.D.), Human-Computer Interaction (Mechanical Engineering) (GPA: 3.62)

- **Achievements:** Outstanding Graduate Student Service Award Purdue University College of Engineering (2020), NSF Graduate Research Fellowship Program Purdue University & NSF (2017 - 2022), Graduate Education for Minorities (GEM) Fellowship

Morehouse College

Bachelor of Science (B.S.), Physics (GPA: 3.66)

SKILLS

- **Expertise:** Artificial Intelligence (AI), Project Management, Mixed-Methods Research, User Research, Visual Design, Interaction Design, Content Design, Data-driven Design, Rapid Prototyping, Design Systems, Educational UI/UX, Usability Testing, Diary Studies, Contextual Inquiry, Semi-Structured Interviews, Unmoderated Studies, Survey Design, Statistical Analysis, Interactive Content, Feature Delivery, Stakeholder Advocacy, A/B Testing, Learning Analytics
- **Technical Skills:** Figma, CAD, Autodesk Suite, Sketch, Principle
- **Programming:** Python, R, C#, C, C++, JavaScript, React, HTML, CSS, Unity3D, MATLAB
- **AI/ML:** OpenCV, Pytorch, SIFT/SURF

PROFESSIONAL EXPERIENCE

Microsoft Corporation | *Hardware Engineer & Technical Product Manager*

May 2022 - Aug 2025

Achievements: Hardware Strategy & Planning Culture Award (2023)

- Led mixed-methods research with internal and partner stakeholders - combining contextual inquiry, semi-structured interviews, and unmoderated usability studies - to extract actionable customer insights and inform roadmap strategy for AI-powered infrastructure management tools.
- Collaborated on Integrated Voltage Regulator and Vertical Power Delivery technology expected to improve power delivery efficiency by approximately 12% (results pending).
- Analyzed behavioral usage logs and telemetry from live deployments to pinpoint adoption patterns, workflow bottlenecks, and feature discoverability issues; synthesized findings into actionable design recommendations that supported TPM decisions.
- Developed and maintained technology roadmaps by evaluating AI workloads and program requirements, delivered a modernized roadmap platform that achieved 90% stakeholder approval and reduced hardware roadmap update time by 33%.
- Monitored and refined key performance indicators (KPIs) including server lifecycle, Capex/OpEx costs, and product recycling; revised internal TCO dashboards with feedback from Data Center Technicians to achieve accelerated improvements.
- Conducted quarterly competitive intelligence analyses, presenting infrastructure trends and emerging technologies from competitors like Meta, AWS, Google, and Nvidia to 75+ stakeholders per session, including senior leadership, reinforcing stakeholder advocacy and engineering discussions.
- Led the Standalone Rack-SCM project, a next-gen rack management solution affecting ~9.2% of first-party racks across Azure's fleet
- Facilitated cross-functional workshops with engineering, product, and design teams to align research-driven insights with strategic roadmap initiatives, effectively managing ambiguity in technology decision-making.
- Managed high-stakes product decisions for the DC-SCM platform that impacted \$3-5M in non-recurring engineering (NRE) costs.

Flare Tech: Laser & Design LLC | *Product Design Consultant*

Jan 2020 - Present

- Designed and developed custom, hand-crafted items by integrating product design principles with rapid prototyping techniques, resulting in products that met client specifications and enhanced user satisfaction.
- Utilized AutoDesk Inventor, Adobe Creative Suite, and Silhouette Studio to generate prototypes and final products, ensuring visual design consistency and interaction clarity.
- Coached novice and aspiring creators to design and fabricate their own products via YouTube video tutorials and one-on-one sessions, achieving a 100% satisfaction rate.
- Co-developed custom laser-cut products through iterative A/B testing by producing 2-3 mockups for customers, soliciting structured feedback on look and feel, and refining designs to achieve a 95% engagement uplift and a 5-star Etsy rating.
- Managed and coordinated design efforts to deliver products that balanced creative vision with material practicality, resulting in

successful project completions and satisfied clients.

Intel Corporation (Performance Analysis Center) | *Software Engineering Intern*

Jun 2016 - Aug 2016

- Benchmarked 40+ workloads across Adobe, Autodesk, Microsoft, Apple, Google, and coding environments on 12 custom system configurations for major OEM customers.
- Used Intel simulation tools and RStudio (R) to analyze CPU/GPU performance metrics, model parameter spaces, and identify next-generation workloads critical to product competitiveness.
- Presented findings to engineering and product leaders, influencing roadmap priorities and contributing to \$2M+ in revenue impact through optimized chip adoption (including Apple's Mac desktop line).

Tevin's Adaptive Toy Drive | *Adaptive Toy Workshop Co-Host*

Dec 2023 - Present

- Co-hosted workshops focused on adapting electronic toys for children with disabilities, ensuring accessibility for users with motor-functioning challenges and sensory issues, as highlighted by media coverage in the [Seattle Times](#) and [Seattle's Child Magazine](#)
- Collaborated with occupational therapists and community members to ideate and modify toy designs, ensuring products effectively met the needs of children with cerebral palsy, spina bifida, and Down syndrome.
- Led hands-on sessions to dismantle and rewire toys, creating accessible buttons and switches that improved user interaction for children with motor and sensory challenges.
- Advocated for inclusive design practices by educating participants on accessibility standards and emphasizing the critical role of user research in product design.

Purdue University | *Graduate Research Assistant*

Aug 2016 - Jun 2022

- Executed qualitative and quantitative UX research (interviews, diary studies, usability testing, surveys) on Augmented Reality (AR) and Internet of Things (IoT) technologies, focusing on user interaction design for 150+ youth aged 12-18.
- Designed and prototyped interactive AR onboarding flows for youth STEM kits by applying visual hierarchy, progressive disclosure, and accessible typography, improving comprehension by 25% in user studies and facilitating end-to-end system creation for digital and electromechanical interactions.
- Coordinated summer projects for the Purdue Minority Engineering Program, leading over 100 youth through both in-person and remote workshops, fostering cross-team collaboration to develop technology-based educational tools, and achieving a parent satisfaction rating above 96% through engaging and impactful program delivery.
- Led Smart Toys & Robots workshops for middle and high school students, employing interactive and visual design methods to engage participants and enhance user learning experiences.

CERTIFICATIONS

- **Google UX Design Professional Certificate:** Industry recognized, 200+ hour program covering the full UX design process. Coursework includes end-to-end UX design process, user research, wireframing, prototyping, and building mobile and web applications. Completed October 2025. [Click Here to View Certificate](#)

EXTRACURRICULAR

Alpha Phi Alpha Fraternity, Inc. | *Vice President – Zeta Pi Lambda Chapter*

2017 - Present

- STEAM Committee chairman - lead workshops for local youth aged 12-18 and prepare them for STEAM fair presentations
- Board Member, Fundraising Chair, and Scholarship Coordinator for the Seattle Alphas Education Foundation (non-profit)

National Society of Black Engineers (NSBE) | *Member*

2013 - Present
