

TERRELL K. GLENN

Seattle, WA | (216) 570-4460 | TGlenn2012@gmail.com | www.linkedin.com/in/tglenn2012 | www.github.com/TGlenn2012 | www.TerrellGlenn.com

EXECUTIVE SUMMARY

Technical leader with a Ph.D. in Human-Computer Interaction, six years of experience, and notable work at Microsoft. Skilled in hardware engineering, product design, UX research, and product management, with proven leadership in developing technology roadmaps and collaborating across teams. Experienced in driving data-based decisions, evaluating AI solutions, and enhancing user experiences. Recognized for impactful projects that improved satisfaction through rapid prototyping and design iteration. Committed to using engineering and design expertise for innovation and effective product team leadership.

EDUCATION

Purdue University

Doctorate (Ph.D.), Human-Computer Interaction (Mechanical Engineering) (GPA: 3.62)

- **Achievements:** Outstanding Graduate Student Service Award Purdue University College of Engineering (2020), NSF Graduate Research Fellowship Program Purdue University & NSF (2017 - 2022), Graduate Education for Minorities (GEM) Fellowship

Morehouse College

Bachelor of Science (B.S.), Physics (GPA: 3.66)

SKILLS

- **Education, Program, & Community Scaling:** Education Program Design, Curriculum/Backward Design, Learning Communities, Project Management, Stakeholder Advocacy, Operational System Development, Feature Delivery, Product Roadmaps.
- **Human-Centered AI & UX Research:** Human-Computer Interaction, Responsible AI, Statistical Analysis (R), Mixed-Methods Research, User-Centered Design (UCD), Usability Testing, Contextual Inquiry, Educational UI/UX, Accessibility (WCAG AA).
- **Data, Systems, & Computational Design:** Retrieval-Augmented Generation (RAG), Model-Context Protocol, Data-driven Design, Cursor, Claude Code, Rapid Prototyping, AI-Enhanced Workflows with LLMs (GPT-5, Claude 3.7 Sonnet), Python, Figma, Unity3D.

PROFESSIONAL EXPERIENCE

Microsoft Corporation | *Hardware Engineer & Technical Product Manager*

May 2022 - Aug 2025

Achievements: Hardware Strategy & Planning Culture Award (2023)

- Engineered a scalable operational platform (HCI-informed Power Apps tool) to **transform fragmented infrastructure roadmaps into a centralized, stakeholder-driven system**. This program achieved **90% stakeholder approval** and measurably improved efficiency by **reducing monthly update time by 33%**, enabling faster, data-driven leadership decisions.
- Led mixed-methods research (contextual inquiry, usability studies) to define the roadmap strategy for AI-powered infrastructure management tools. Synthesized findings on user adoption patterns and **workflow bottlenecks into actionable design recommendations** to enhance feature discoverability for enterprise users.
- Drove the end-to-end program definition for a critical DC-SCM platform (server module), securing leadership approval and adding the product to the hardware roadmap. This strategic decision influenced multi-million dollar engineering investments, impacting **\$3-5M in non-recurring engineering (NRE) costs**.
- **Designed and refined key performance indicators (KPIs)** and internal TCO dashboards, utilizing direct user feedback gathered from Data Center Technicians to accelerate process improvements and ensure technology solutions met evolving user expectations
- Conducted quarterly competitive intelligence analyses, presenting infrastructure trends and emerging technologies from competitors like Meta, AWS, Google, and Nvidia to **75+ stakeholders per session, including senior leadership**.
- Led the Standalone Rack-SCM project, a next-gen rack management solution affecting **~9.2% of first-party racks** across Azure's fleet.

Flare Tech: Laser & Design LLC | *Product Design Consultant*

Jan 2020 - Present

- **Led end-to-end user-centered design and rapid prototyping** for custom, physical products, defining user specifications and integrating digital design principles with fabrication techniques (laser cutting, 3D printing).
- **Applied iterative UX methodologies (A/B testing, structured feedback)** by producing 2-3 mockups per customer, resulting in a **95% engagement uplift and consistent 5-star Etsy rating**.
- Utilized a multi-tool design stack - including Figma, Autodesk Inventor, and Adobe Creative Suite - to manage design systems, ensuring **visual design consistency and interaction clarity** across digital mockups and final physical products.
- Managed design efforts and project timelines to deliver products that successfully balanced creative vision, material practicality, and client specifications.
- Provided technical design consultation and coaching to novice creators via video tutorials and one-on-one sessions, achieving a **100% client satisfaction rate**.
- **Pioneered an AI-Accelerated Design Workflow** to develop a desktop-first, responsive 0→1 micro-app in 5 days. This initiative leveraged **GPT-5 for meta prompt engineering** and **Claude 3.7 Sonnet for rapid UI prototyping**, validating how AI tools accelerate minimum viable product (MVP) development and streamline design-to-code iteration.

Tevin's Adaptive Toy Drive | *Founding Program Lead & Adaptive Design Workshop Host*

Dec 2023 - Present

- **Transformed a grassroots, seasonal effort into a sustainable, systems-level community program** dedicated to inclusive play, expanding the initiative to a year-round service through partnerships with local businesses, non-profits organizations, and community members.
- **Built and managed institutional partnerships** with clinical organizations, including Seattle Children's Hospital, Boyer Children's Clinic, and the Down Syndrome Center of Puget Sound, establishing a sustainable pipeline that has **distributed over 100 adaptive toys** to children with disabilities.
- **Designed and delivered inclusive design workshops** for community members and corporate partners (e.g., securing corporate engagement for an upcoming 55-employee adaptation event). The workshops trained participants on **repeatable, safe processes** for modifying electronic toys (dismantling, rewiring switches).
- **Leveraged human-centered research and collaboration with occupational therapists** to ideate and refine toy adaptations for complex needs (e.g., cerebral palsy, motor-functioning challenges), ensuring solutions adhere to accessibility standards.
- Employed **media coverage and storytelling** to successfully raise awareness for the program, validate the importance of adaptive play, and attract institutional support (see the [Seattle Times](#) and [Seattle's Child Magazine](#))

Purdue University (Convergence Design Lab) | *UX Researcher*

Aug 2016 - Jun 2022

- Executed qualitative and quantitative UX research (interviews, diary studies, usability testing, surveys) on Augmented Reality (AR) and Internet of Things (IoT) technologies, focusing on **user interaction design for 150+ youth aged 12-18**.
- Designed and prototyped interactive AR onboarding flows for youth STEM kits by applying visual hierarchy, progressive disclosure, and accessible typography, **improving comprehension by 25% in user studies** and facilitating end-to-end system creation for digital and electromechanical interactions.
- Coordinated summer projects for the Purdue Minority Engineering Program, **leading over 100 youth through both in-person and remote workshops**, fostering cross-team collaboration to develop technology-based educational tools, and achieving a **parent satisfaction rating above 96%** through engaging and impactful program delivery.
- Led Smart Toys & Robots workshops for middle and high school students, employing interactive and visual design methods to engage participants and enhance user learning experiences.

Intel Corporation (Performance Analysis Center) | *Software Engineering Intern*

Jun 2016 - Aug 2016

- **Benchmarked 40+ workloads** across Adobe, Autodesk, Microsoft, Apple, Google, and coding environments on 12 custom system configurations for major OEM customers.
- Used Intel simulation tools and RStudio (R) to analyze CPU/GPU performance metrics, model parameter spaces, and identify next-generation workloads critical to product competitiveness.
- Presented findings to engineering and product leaders, influencing roadmap priorities and **contributing to \$2M+ in revenue impact** through optimized chip adoption (including Apple's Mac desktop line).

CERTIFICATIONS

- **Google UX Design Professional Certificate:** Industry recognized, 200+ hour program covering the full UX design process. Course- work includes end-to-end UX design process, user research, wireframing, prototyping, and building mobile and web applications. Completed October 2025. [Click Here to View Certificate](#)

EXTRACURRICULAR

Alpha Phi Alpha Fraternity, Inc. | *Vice President – Zeta Pi Lambda Chapter*

2017 - Present

- STEAM Committee chairman - lead workshops for local youth aged 12-18 and prepare them for STEAM fair presentations
- Board Member, Fundraising Chair, and Scholarship Coordinator for the Seattle Alphas Education Foundation (non-profit)

National Society of Black Engineers (NSBE) | *Member*

2013 - Present
